

Interested in Coding?

MAKE SURE YOU CHECK WITH YOUR PARENTS BEFORE YOU GO TO ANY OF THESE WEB SITES!

Learn to make games with Scratch - you can start with this tutorial on their website, no need to download anything:
<https://scratch.mit.edu/projects/editor/?tutorial=getStarted>

Pico-8 is a fantasy console that will let you create and play your own games with a very simple programming language called Lua. Free educational version:
<https://www.pico-8-edu.com/>

Tutorials and manuals can be found at
<https://www.lexaloffle.com/pico-8.php?page=resources>

Ready for something more advanced? This tutorial will teach you Python in small steps in a fun little game:

<https://codingforkids.io/en/>

Newcastle Libraries run a Code Club at West End Library for 9 - 13 year olds:

<https://childrenandfamiliesnewcastle.org.uk/events/code-club-west-end-library>

If you've done all that and you're looking for more, then Google:

HTML for webpages
CSS to make them pretty
Javascript to make them interactive

GO MAKE STUFF
AND
HAPPY CODING!
